Tool

Assembly and Usage

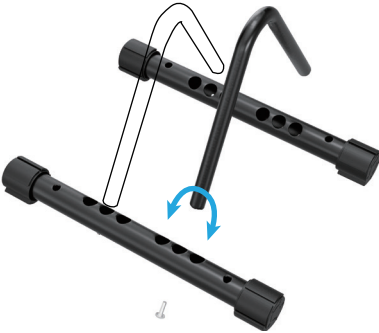

1

Place the leg tubes angle correctly.
Make sure the small hole angle must be vertically upwards.

2

Insert the V tubes into the mounting holes on the leg tubes.
Freely adjust the interval according to your tire width.

3

Fasten all screws tightly.
If the stand is uneven and shakes, keep it steady by swiveling the feet. High is increased from number 1 to 5.

4

If you use it outdoors, it is better to use the provided expansion screws to fix it to the ground.

5

Outdoor Use:
Fix the Bike Stand on the ground or to the wall accordingly.
